DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I, claims 1-5 in the reply filed on April 3, 2007 is acknowledged. The traversal is on the ground(s) that to examine both inventions would not be burdensome to the examiner. This is not found persuasive, as the claimed inventions are distinct, as stated in the office action mailed January 3, 2007.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jonas (US 4971824) in view of the combination of Koss et al. (WO 02/094035) and Blake (US 4244981). The references and rejection are incorporated herein and as stated in the office action mailed April 17, 2006.

Response to Arguments

Applicant's arguments filed July 28, 2006 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., a confection containing milk proteins) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant argues that Jonas teaches away from the claimed invention by teaching that it is preferred for milk and milk products to not be included in the confection. This is not convincing as applicant's claims recite as little as "about 0.25%"

Art Unit: 1761

non-fat milk solids, and one of ordinary skill in the art would expect "about 0.25%" to encompass 0%.

In response to applicant's arguments against the references individually, specifically against the secondary reference, Koss, applicant is reminded that one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Applicant argues that the references of record do not teach of the recited fiber ranges as instantly claimed. This is not convincing as Jones (Examples 1-7) teaches that the confectionary products contain about 1-55% fruit puree and because applicant states (pages 5-6 of the specification) that the instantly claimed amounts of fiber are derived from about 5-80% fruit puree. Thus, one of ordinary skill in the art would expect the references as cited herein to read upon the instantly claimed invention, as the ingredient that contributes fiber is included in similar amounts in the confectionary product.

Note: Claim 1 recites, "no additional stabilizers or emulsifiers *as herein defined*". It is unclear as to what is encompassed by the phrase, "as herein defined". While the claims are read in light of the specification, the specification cannot be read into the claims, and thus it is unclear as to what additional stabilizers or emulsifiers are not included in the composition as instantly claimed. Amendment of the claim is requested.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1761

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
